

Updating hrgset after entered manually in scheduling block

Scott Adams - 2024-07-07 - Older Knowledgebase Items

Due to ongoing conflict checker issues, some times a docket clerk may enter a hearing in the scheduling block directly. When they do this, several items seem to not be entering correctly.

These are:

- Block
- Dispute
- Motion

To enter these you will need to do an evemod on the hrgset event.

You will need to enter in the modify an event screen the dispute numbers associated if any

MODIFY AN EVENT						
eve_id	3430629	eve_docid	78258			
DATE	NAME	DISPUTES	ENTRY DATE	ENTERED BY	JUDGE	HAIR
01/25/2017	hrgset	2-4	01/25/2017	htessier	MAM	

Then you will need to go into the hair and choose **C**

You will want to enter in the 2 following items

- **motls** if there is a motion
- **blo_type** for the block type

ECODE ADD/UPD/DELETE (5) hrgset 3430629		
eco_code	eco_type	eco_tag
25	motls	0
juvenile	blo_type	0
02:00	schsize	0
14:00	schtime	0
motion	sch_type	0
